

WEBSITE DESIGN PROPOSAL

Morning Brew Coffee

A responsive e-commerce experience for discovering, selecting, and purchasing freshly roasted coffee.

MIDTERM PROPOSAL

Prepared for the Midterm and Final Project

September 2026

Better Coffee, Better Mornings.

Concept & design system

A practical plan that extends the existing landing-page code into a complete store.

PROJECT CONCEPT

Morning Brew Coffee is a direct-to-consumer coffee shop focused on fresh small-batch roasts. The site will guide visitors from brand discovery through a clear, trustworthy checkout flow.

AUDIENCE & GOALS

AUDIENCE

Coffee drinkers who value freshness, simple choices, and convenient delivery.

BUSINESS GOAL

Convert first-time visitors with clear product information and a 20% welcome offer.

USER GOAL

Compare roasts quickly, understand flavor notes, and complete a purchase without confusion.

RESPONSIVE GRID SYSTEM

Desktop uses a 12-column CSS Grid with a 24px gap and a centered max-width container. Tablet adapts to 8 columns; mobile uses 4 columns with a 16px gap. Content spans change at breakpoints instead of using fixed widths.

12-COLUMN DESKTOP GRID / CONSISTENT GAPS / FLEXIBLE CONTENT SPANS

Landing / Advertisement / Main

The brand introduction and primary path into the shop.

PAGE PURPOSE

Introduce the brand, advertise the welcome discount, and move visitors toward featured products.

KEY CONTENT & INTERACTIONS

- Hero headline, supporting copy, and a prominent Shop Now call-to-action.
- Three featured roast cards, the WELCOME20 promotion, brand story, and newsletter form.
- Persistent navigation connects Home, Shop, About, Contact, and Cart.

GRID PLAN

Hero text spans 7 columns and supporting visual spans 5. Featured products use three 4-column cards. About and newsletter sections each span the full 12 columns.

RESPONSIVE BEHAVIOR

At tablet width, the hero becomes a balanced 4/4 split and product cards can wrap. On mobile, all content stacks in one 4-column flow; navigation becomes compact and buttons become easier to tap.

WIREFRAME

Product List

A browsable catalog with useful sorting and filtering.

PAGE PURPOSE

Help shoppers scan the complete coffee selection, narrow choices, and open a product for more detail.

KEY CONTENT & INTERACTIONS

- Product cards show roast name, image, tasting notes, roast level, price, and quick-add action.
- Filter controls cover roast level, origin, and price; sorting supports featured and price order.
- Results count and active filter states make the catalog understandable.

GRID PLAN

A 3-column filter area sits beside a 9-column product grid. Product cards use three equal 3-column spans inside the results area.

RESPONSIVE BEHAVIOR

Tablet uses two product cards per row. Mobile moves filters into a collapsible control and shows one product per row with full-width card content.

WIREFRAME

Product Individual Item

Focused product information with a confident add-to-cart decision.

PAGE PURPOSE

Answer product questions and let the customer choose options before adding the item to the cart.

KEY CONTENT & INTERACTIONS

- Large product image, roast name, price, tasting notes, origin, process, and freshness details.
- Selectors for bag size, grind type, and quantity with a clear Add to Cart button.
- Related products encourage continued browsing without distracting from the main action.

GRID PLAN

Product gallery spans 7 columns; purchase information spans 5. Details and recommendations each use the full width below.

RESPONSIVE BEHAVIOR

The two-column detail view stacks on mobile with the image first. Selectors and Add to Cart become full-width, with at least 44px touch targets.

YOU MAY ALSO LIKE

Cart Review

A transparent review step before checkout.

PAGE PURPOSE

Let shoppers verify items, quantities, costs, and promotions before entering checkout.

KEY CONTENT & INTERACTIONS

- Editable item rows include product option, unit price, quantity controls, remove action, and line total.
- Order summary shows subtotal, discount, estimated shipping, and final estimated total.
- Promo-code field, Continue Shopping link, and high-priority Checkout button.

GRID PLAN

Cart items occupy 8 columns and the order summary occupies 4. The summary may remain sticky on desktop while the item list scrolls.

RESPONSIVE BEHAVIOR

Tablet keeps the split with adjusted spans. Mobile stacks the order summary below item cards and makes checkout a full-width primary action.

WIREFRAME

Cart Checkout / Purchase

A short, reassuring form for delivery and payment.

PAGE PURPOSE

Collect only the information needed to deliver the order and complete payment securely.

KEY CONTENT & INTERACTIONS

- Contact, shipping address, delivery method, payment, and billing sections use clear labels.
- Inline validation explains errors near the field and preserves previously entered information.
- Order summary, security note, return information, and final Place Order action build trust.

GRID PLAN

Checkout form spans 7 columns; the sticky order summary spans 5. Related fields such as city/state/ZIP share nested columns.

RESPONSIVE BEHAVIOR

All fields stack in a logical single-column order on mobile. The order summary becomes collapsible near the top, while the final payment button stays visually prominent.

WIREFRAME

The wireframe shows a checkout page for 'MORNING BREW'. The header is dark with 'MORNING BREW' on the left and 'SHOP CART' on the right. The main content area is titled 'CHECKOUT' and features a progress bar with three steps: '1 CART', '2 INFORMATION', and '3 PAYMENT'. The form fields are arranged in a single column: 'EMAIL ADDRESS', 'STREET ADDRESS', 'CITY', 'ZIP', and 'CARD NUMBER'. On the right side, there is an 'ORDER' summary box containing '2 items', 'Total \$34', and a 'PAY NOW' button.

Purchase Confirmation

A clear success state with order details and next steps.

PAGE PURPOSE

Confirm that payment succeeded, reduce uncertainty, and show what will happen next.

KEY CONTENT & INTERACTIONS

- Success message, order number, email confirmation notice, and estimated delivery date.
- Order summary includes purchased items, shipping destination, payment total, and support link.
- Continue Shopping and optional Create Account actions support the next visit.

GRID PLAN

The success message uses an 8-column centered area. Order and delivery details sit in two 6-column panels, followed by full-width next actions.

RESPONSIVE BEHAVIOR

On mobile, confirmation details become stacked cards. The order number and support information remain easy to copy and read without horizontal scrolling.
